CAREER OBJECTIVE

Highly analytical Data Science & Analytics professional and MCA student with a strong background in statistics, mathematics, and quantitative logic. Possesses robust expertise in statistical interpretation, probability, and numerical reasoning. Seeking to leverage analytics experience to evaluate complex datasets, verify calculations, and ensure the sound application of quantitative methods. Proven ability to spot statistical fallacies, validate regressions, and maintain rigorous data logic across diverse domains.

EDUCATIONAL QUALIFICATIONS

Master of Computer Applications (AI & ML) 2025 – 2027
Chandigarh University (Strong curriculum focus on Statistics & Mathematics)

Bachelor of Computer Applications (Computer Science) 2021 – 2024
T.M. Bhagalpur University

CORE COMPETENCIES & SKILLS

- **Data Science & Analytics:** Statistical Analysis, Data Interpretation, Numerical Interpretations, Data Summarization, Evaluating Charts & Datasets.
- **Statistical Methods:** Causal Inference, Probability, Hypothesis Testing, Regressions, p-values, Confidence Intervals, Model Assumptions.
- **Analytical Reasoning:** Quantitative Logic, Statistical Reasoning, Identifying Misuse of Statistics, Spotting Statistical Fallacies, Multi-Step Problem Solving.
- **Programming & Tools:** Python, SQL (PostgreSQL, MySQL), Power BI, Pandas, Scikit-Learn.

PROFESSIONAL EXPERIENCE (DATA SCIENCE & ANALYTICS)

TBI GEU | *Data & Business Intelligence Intern* Jun 2026 – Jul 2026

- Evaluated complex charts, datasets, and numerical claims to drive data-driven decision-making across operational domains.
- Verified calculations and assessed statistical validity, identifying conceptual errors in data interpretation to ensure accurate reporting.
- Analyzed operational tasks involving quantitative logic and data summarization, annotating errors in data logic before finalizing reports.

Enginow | *Machine Learning & Analytics Intern* Jan 2026 – Feb 2026

- Checked p-values, confidence intervals, and model assumptions during the training and validation of analytical models.
- Ensured rigorous statistical interpretation by validating regressions and ensuring the sound application of quantitative methods.
- Reviewed statistical claims generated by predictive pipelines to identify and correct potential misuse of statistics.

Codec Technologies India | *Data & AI Intern* Mar 2026 – Apr 2026

- Solved multi-step data problems by applying statistical tests and strong statistical reasoning to real-world business scenarios.
- Assisted in identifying statistical fallacies in preliminary data models, improving the overall reliability of numerical outputs.

TECHNICAL PROJECTS (STATISTICAL ANALYSIS & DATA LOGIC)

Election Process Assistant | *Quantitative Logic & Data Summarization* 2026

- Processed and summarized extensive civic datasets for the BuildWithAI challenge (Round 2), applying rigorous numerical reasoning to extract actionable insights.
- Validated charts and numerical interpretations of election data, ensuring conceptual accuracy and eliminating data-misinterpretation.

Medicine Store Data Analytics Engine | *Statistical Validity & Regressions* 2025

– Developed a Python and SQL-based analytics workflow to evaluate inventory datasets and verify complex stock calculations.
– Annotated errors in causal inference related to sales trends, ensuring that numerical claims drawn from the data were statistically valid.

CERTIFICATIONS & ACHIEVEMENTS

– **Certifications:** Tata GenAI Powered Data Analytics, Deloitte Australia Technology Job Simulation, Google Foundations of Project Management.
– **Leadership:** Represented GeeksforGeeks as Campus Mantri (Jan-Jul 2026), orchestrating technical problem-solving events.
– **Competitions:** Certificate of Participation in GCET Hackathon (2026) & TATA Crucible Campus Quiz (2025).
